OF

UNEMPLOYMENT INSURANCE

PROGRAM RESEARCH

STUDIES

1971 - 1977

Prepared for the  
Unemployment Insurance Service  
Employment and Training Administration  
U. S. Department of Labor

by

Robert L. Crosslin, Ph.D.

December 1977

## PREFACE TO 1977 UPDATE

This Bibliography updates the Selected Bibliography of Unemployment Insurance Program Research Studies 1951-1970, August 1971. This update lists only those studies completed by or for the Unemployment Insurance Service, Employment and Training Administration, U.S. Department of Labor. Therefore, it does not include: (1) studies which were not completed under contract with the UIS, (2) studies by or for other Federal agencies, and (3) studies by non-governmental agencies such as universities and foundations. Current plans are to update the Bibliography for these types of studies in the near future also.

As was true with the 1971 publication, the studies in this update relate primarily to the program aspects of unemployment insurance. Actuarial and financial studies of unemployment insurance are listed in a separate compilation titled A Selected Annotated Bibliography of Unemployment Insurance Financing, November 1967. Current plans are to update this publication in the near future also.

The listings in this update are grouped by subject area, corresponding to the subject areas in the 1971 Bibliography. One new heading, JOB SEARCH BEHAVIOR, has been added to this update. The pages in this update may be separated and inserted at the front of each section of the 1971 Bibliography (published in loose-leaf form), if desired. Pages in this listing are dated 12/77 for this purpose.
