Connect with DOL at <https://blog.dol.gov>

TRANSMISSION OF MATERIALS IN THIS RELEASE IS EMBARGOED UNTIL  
**8:30 A.M. (Eastern) Thursday, March 19, 2020**

*Note: This week's release reflects the annual revision to the weekly unemployment claims seasonal adjustment factors. The seasonal adjustment factors used for the UI Weekly Claims data from 2015 forward, along with the resulting seasonally adjusted values for initial claims and continuing claims, have been revised.*

## UNEMPLOYMENT INSURANCE WEEKLY CLAIMS

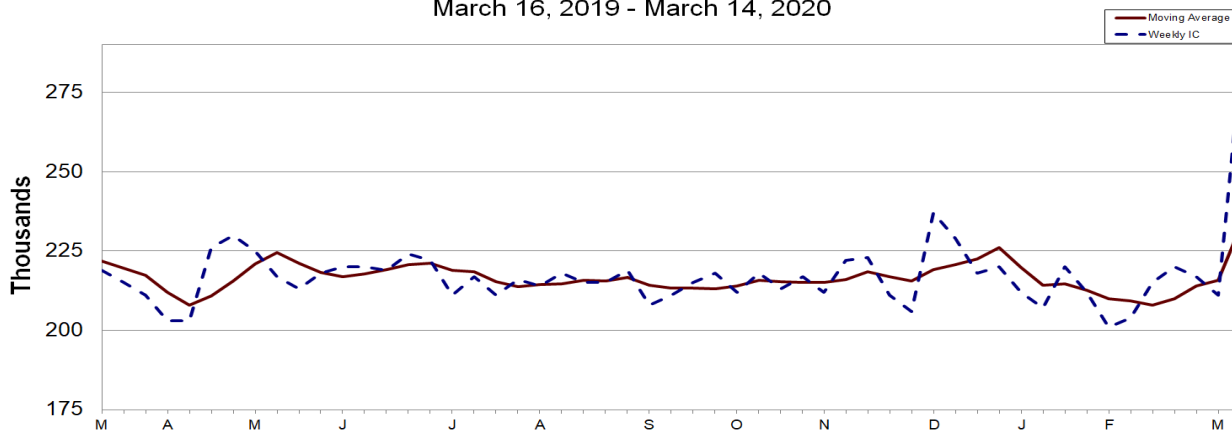

During the week ending March 14, the increase in initial claims are clearly attributable to impacts from the COVID-19 virus. A number of states specifically cited COVID-19 related layoffs, while many states reported increased layoffs in service related industries broadly and in the accommodation and food services industries specifically, as well as in the transportation and warehousing industry, whether COVID-19 was identified directly or not.

### SEASONALLY ADJUSTED DATA

In the week ending March 14, the advance figure for seasonally adjusted **initial claims** was 281,000, an increase of 70,000 from the previous week's unrevised level of 211,000. This is the highest level for initial claims since September 2, 2017 when it was 299,000. The 4-week moving average was 232,250, an increase of 16,500 from the previous week's revised average. This is the highest level for this average since January 27, 2018 when it was 234,500. The previous week's average was revised up by 1,750 from 214,000 to 215,750.

The advance seasonally adjusted **insured unemployment rate** was 1.2 percent for the week ending March 7, unchanged from the previous week's unrevised rate. The advance number for seasonally adjusted **insured unemployment** during the week ending March 7 was 1,701,000, an increase of 2,000 from the previous week's revised level. The previous week's level was revised down by 23,000 from 1,722,000 to 1,699,000. The 4-week moving average was 1,703,250, a decrease of 7,000 from the previous week's revised average. The previous week's average was revised down by 17,250 from 1,727,500 to 1,710,250.

Seasonally Adjusted Initial Claims  
March 16, 2019 - March 14, 2020

## Seasonally Adjusted Insured Unemployment

March 9, 2019 - March 7, 2020

### UNADJUSTED DATA

The advance number of actual initial claims under state programs, unadjusted, totaled 250,892 in the week ending March 14, an increase of 50,517 (or 25.2 percent) from the previous week. The seasonal factors had expected a decrease of 12,023 (or -6.0 percent) from the previous week. There were 194,335 initial claims in the comparable week in 2019.

The advance unadjusted insured unemployment rate was 1.4 percent during the week ending March 7, unchanged from the prior week. The advance unadjusted number for persons claiming UI benefits in state programs totaled 1,976,544, a decrease of 80,706 (or -3.9 percent) from the preceding week. The seasonal factors had expected a decrease of 83,241 (or -4.0 percent) from the previous week. A year earlier the rate was 1.4 percent and the volume was 2,008,348.

## Not Seasonally Adjusted Initial Claims

March 17, 2018 - March 14, 2020

## Not Seasonally Adjusted Insured Unemployment

March 10, 2018 - March 7, 2020

The total number of people claiming benefits in all programs for the week ending February 29 was 2,087,182, a decrease of 49,559 from the previous week. There were 2,120,283 persons claiming benefits in all programs in the comparable week in 2019.

No state was triggered "on" the Extended Benefits program during the week ending February 29.

Initial claims for UI benefits filed by former Federal civilian employees totaled 553 in the week ending March 7, a decrease of 23 from the prior week. There were 507 initial claims filed by newly discharged veterans, an increase of 80 from the preceding week.

There were 10,496 former Federal civilian employees claiming UI benefits for the week ending February 29, an increase of 237 from the previous week. Newly discharged veterans claiming benefits totaled 5,352, a decrease of 215 from the prior week.

The highest insured unemployment rates in the week ending February 29 were in Alaska (2.7), New Jersey (2.7), Connecticut (2.5), Montana (2.4), Pennsylvania (2.4), Rhode Island (2.4), West Virginia (2.4), Illinois (2.3), California (2.2), Minnesota (2.2), and Puerto Rico (2.2).

The largest increases in initial claims for the week ending March 7 were in California (+1,707), Texas (+1,663), Washington (+846), North Carolina (+808), and Florida (+472), while the largest decreases were in New York (-17,173), Ohio (-3,371), Georgia (-969), Virginia (-740), and Wisconsin (-606).

Note: Advance claims are not directly comparable to claims reported in prior weeks. Advance claims are reported by the state liable for paying the unemployment compensation, whereas previous weeks reported claims reflect claimants by state of residence. In addition, claims reported as "workshare equivalent" in the previous week are added to the advance claims as a proxy for the current week's "workshare equivalent" activity.

\*Denotes state estimate.

Figures appearing in columns showing over-the-week changes reflect all revisions in data for prior week submitted by state agencies.

1. The Unemployment Compensation program for Federal Employees (UCFE) and the Unemployment Compensation for Ex-servicemembers (UCX) exclude claims filed jointly under other programs to avoid duplication.
2. Rate is not seasonally adjusted. The source of U.S. total covered employment is BLS.

**UNADJUSTED INITIAL CLAIMS FOR WEEK ENDED MARCH 7, 2020**

---

**STATES WITH AN INCREASE OF MORE THAN 1,000**

---

<b>State</b>	<b>Change</b>	<b>State Supplied Comment</b>
CA	+1,707	No comment.
TX	+1,663	Layoffs in the manufacturing industry.

**STATES WITH A DECREASE OF MORE THAN 1,000**

---

<b>State</b>	<b>Change</b>	<b>State Supplied Comment</b>
NY	-17,173	Fewer layoffs in the transportation and warehousing, accommodation and food service, and education service industries.
OH	-3,371	No Comment.

---

## TECHNICAL NOTES

This news release presents the weekly unemployment insurance (UI) claims reported by each state's unemployment insurance program offices. These claims may be used for monitoring workload volume, assessing state program operations and for assessing labor market conditions. States initially report claims directly taken by the state liable for the benefit payments, regardless of where the claimant who filed the claim resided. These are the basis for the advance initial claims and continued claims reported each week. These data come from ETA 538, Advance Weekly Initial and Continued Claims Report. The following week initial claims and continued claims are revised based on a second reporting by states that reflect the claimants by state of residence. These data come from the ETA 539, Weekly Claims and Extended Benefits Trigger Data Report.

### A. Initial Claims

An initial claim is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place and these result in activity counts including the count of initial claims. The count of U.S. initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data which are difficult to seasonally adjust, making the series subject to some volatility.

### B. Continued Weeks Claimed

A person who has already filed an initial claim and who has experienced a week of unemployment then files a continued claim to claim benefits for that week of unemployment. Continued claims are also referred to as insured unemployment. The count of U.S. continued weeks claimed is also a good indicator of labor market conditions. Continued claims reflect the current number of insured unemployed workers filing for UI benefits in the nation. While continued claims are not a leading indicator (they roughly coincide with economic cycles at their peaks and lag at cycle troughs), they provide confirming evidence of the direction of the U.S. economy.

### C. Seasonal Adjustments and Annual Revisions

Over the course of a year, the weekly changes in the levels of initial claims and continued claims undergo regularly occurring fluctuations. These fluctuations may result from seasonal changes in weather, major holidays, the opening and closing of schools, or other similar events. Because these seasonal events follow a more or less regular pattern each year, their influence on the level of a series can be tempered by adjusting for regular seasonal variation. These adjustments make trend and cycle developments easier to spot. At the beginning of each calendar year, the Bureau of Labor Statistics provides the Employment and Training Administration (ETA) with a set of seasonal factors to apply to the unadjusted data during that year. Concurrent with the implementation and release of the new seasonal factors, ETA incorporates revisions to the UI claims historical series caused by updates to the unadjusted data.
