UNEMPLOYMENT INSURANCE WEEKLY CLAIMS

SEASONALLY ADJUSTED DATA

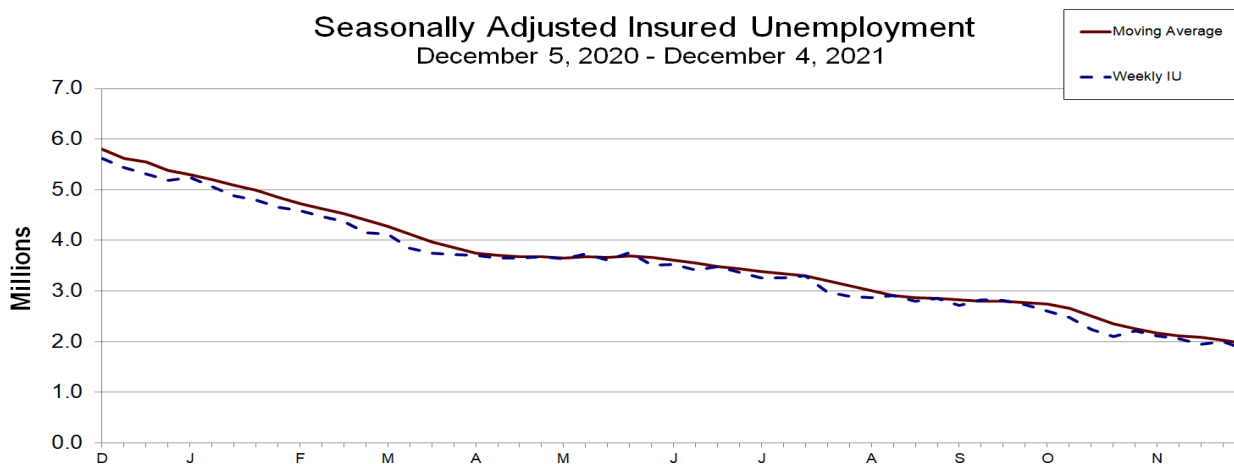

In the week ending December 11, the advance figure for seasonally adjusted **initial claims** was 206,000, an increase of 18,000 from the previous week's revised level. The previous week's level was revised up by 4,000 from 184,000 to 188,000. The 4-week moving average was 203,750, a decrease of 16,000 from the previous week's revised average. This is the lowest level for this average since November 15, 1969 when it was 202,750. The previous week's average was revised up by 1,000 from 218,750 to 219,750.

The advance seasonally adjusted **insured unemployment rate** was 1.4 percent for the week ending December 4, a decrease of 0.1 percentage point from the previous week's unrevised rate. The advance number for seasonally adjusted **insured unemployment** during the week ending December 4 was 1,845,000, a decrease of 154,000 from the previous week's revised level. This is the lowest level for insured unemployment since March 14, 2020 when it was 1,770,000. The previous week's level was revised up 7,000 from 1,992,000 to 1,999,000. The 4-week moving average was 1,963,250, a decrease of 66,000 from the previous week's revised average. This is the lowest level for this average since March 14, 2020 when it was 1,730,750. The previous week's average was revised up by 1,750 from 2,027,500 to 2,029,250.

Seasonally Adjusted Initial Claims
December 12, 2020 - December 11, 2021

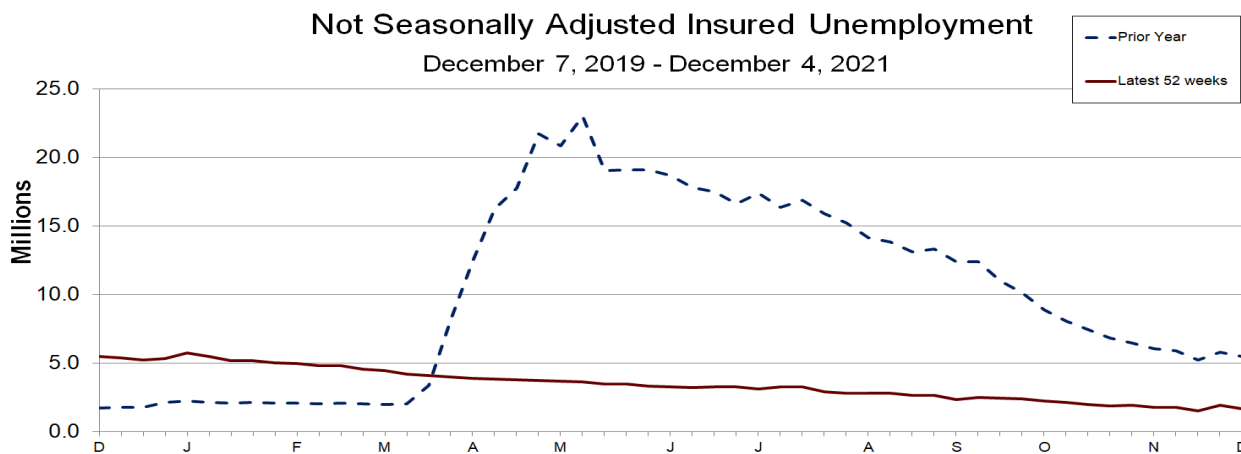

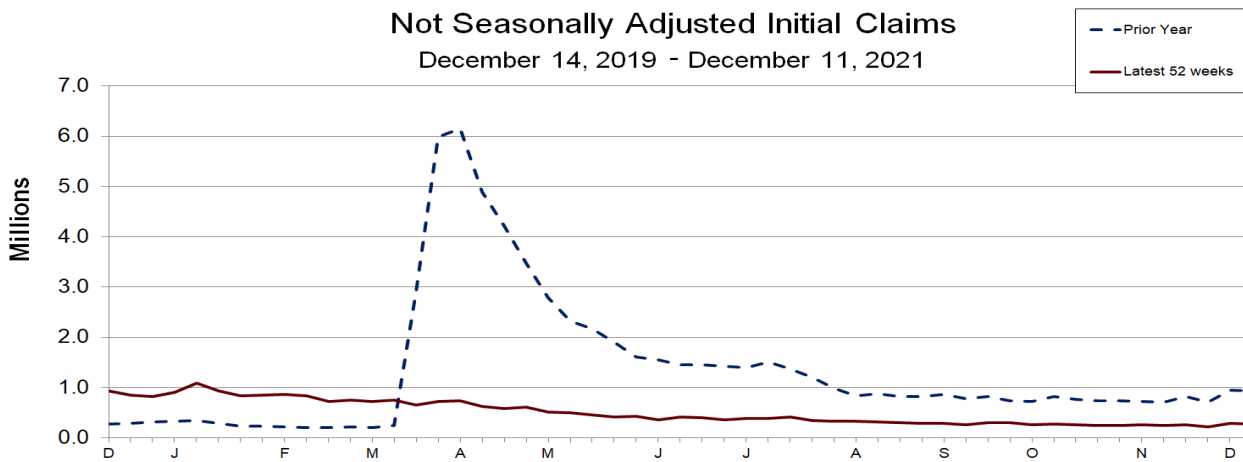

Seasonally Adjusted Insured Unemployment
December 5, 2020 - December 4, 2021

UNADJUSTED DATA

The advance number of actual initial claims under state programs, unadjusted, totaled 267,509 in the week ending December 11, a decrease of 16,426 (or -5.8 percent) from the previous week. The seasonal factors had expected a decrease of 34,989 (or -12.3 percent) from the previous week. There were 928,634 initial claims in the comparable week in 2020. In addition, for the week ending December 11, 32 states reported 1,854 initial claims for Pandemic Unemployment Assistance.

The advance unadjusted insured unemployment rate was 1.3 percent during the week ending December 4, a decrease of 0.2 percentage point from the prior week. The advance unadjusted level of insured unemployment in state programs totaled 1,712,958, a decrease of 252,821 (or -12.9 percent) from the preceding week. The seasonal factors had expected a decrease of 99,264 (or -5.0 percent) from the previous week. A year earlier the rate was 3.7 percent and the volume was 5,479,756.

The total number of continued weeks claimed for benefits in all programs for the week ending November 27 was 2,458,419, an increase of 510,808 from the previous week. There were 21,316,898 weekly claims filed for benefits in all programs in the comparable week in 2020.

During the week ending November 27, Extended Benefits were available in the following 4 states: Alaska, Connecticut, New Jersey, and New Mexico.

Initial claims for UI benefits filed by former Federal civilian employees totaled 1,092 in the week ending December 4, an increase of 232 from the prior week. There were 488 initial claims filed by newly discharged veterans, an increase of 213 from the preceding week.

There were 9,786 continued weeks claimed filed by former Federal civilian employees the week ending November 27, an increase of 1,836 from the previous week. Newly discharged veterans claiming benefits totaled 5,301, an increase of 1,001 from the prior week.

During the week ending November 27, 39 states reported 194,189 continued weekly claims for Pandemic Unemployment Assistance benefits and 40 states reported 136,413 continued claims for Pandemic Emergency Unemployment Compensation benefits.

The highest insured unemployment rates in the week ending November 27 were in Alaska (3.2), California (2.9), the Virgin Islands (2.7), District of Columbia (2.6), Puerto Rico (2.6), New Jersey (2.5), Hawaii (2.3), Illinois (2.2), Minnesota (2.2), and Georgia (2.1).

The largest increases in initial claims for the week ending December 4 were in Texas (+8,639), New York (+8,523), California (+8,487), Michigan (+4,182), and Illinois (+3,390), while the largest decreases were in Virginia (-3,096) and North Carolina (-1,718).

FOOTNOTES

SA - Seasonally Adjusted Data, NSA - Not Seasonally Adjusted Data Continued weeks claimed represent all weeks of benefits claimed during the week being reported, and do not represent weeks claimed by unique individuals.

1. Prior year is comparable to most recent data.
2. Most recent week used covered employment of 135,015,266 as denominator.
3. Information on the Pandemic Unemployment Assistance (PUA) program can be found in UIPL 16-20: [PUA Program information](#)
4. Information on the Pandemic Emergency Unemployment Compensation (PEUC) program can be found in Unemployment Insurance Program Letter (UIPL) 17-20: [PEUC Program information](#)
5. Information on the EB program can be found here: [EB Program information](#)
6. Some states maintain additional benefit programs for those claimants who exhaust regular benefits, and when applicable, extended benefits. Information on states that participate, and the extent of benefits paid, can be found starting on page 4-4 of this link: [Extensions and Special Programs PDF](#)
7. Information on STC/Worksharing can be found starting on page 9-10 of the following link: [Extensions and Special Programs PDF](#)
8. Totals include PUA Unemployment for the appropriate corresponding week.

Note: Advance claims are not directly comparable to claims reported in prior weeks. Advance claims are reported by the state liable for paying the unemployment compensation, whereas previous weeks reported claims reflect claimants by state of residence. In addition, claims reported as "workshare equivalent" in the previous week are added to the advance claims as a proxy for the current week's "workshare equivalent" activity.

*Denotes OUI estimate.

**Denotes state estimate.

STATES WITH A DECREASE OF MORE THAN 1,000

State	Change	State Supplied Comment
VA	-3,096	No comment.
NC	-1,718	Fewer layoffs in the manufacturing industry.

TECHNICAL NOTES

This news release presents the weekly unemployment insurance (UI) claims reported by each state's unemployment insurance program offices. These claims may be used for monitoring workload volume, assessing state program operations and for assessing labor market conditions. States initially report claims directly taken by the state liable for the benefit payments, regardless of where the claimant who filed the claim resided. These are the basis for the advance initial claims and continued claims reported each week. These data come from ETA 538, Advance Weekly Initial and Continued Claims Report. The following week initial claims and continued claims are revised based on a second reporting by states that reflect the claimants by state of residence. These data come from the ETA 539, Weekly Claims and Extended Benefits Trigger Data Report.

A. Initial Claims

An initial claim is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place and these result in activity counts including the count of initial claims. The count of U.S. initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data which are difficult to seasonally adjust, making the series subject to some volatility.

B. Continued Weeks Claimed

A person who has already filed an initial claim and who has experienced a week of unemployment then files a continued claim to claim benefits for that week of unemployment. On a weekly basis, continued claims are also referred to as insured unemployment, as continued claims reflect a good approximation of the current number of insured unemployed workers filing for UI benefits. The count of U.S. continued weeks claimed is also a good indicator of labor market conditions. While continued claims are not a leading indicator (they roughly coincide with economic cycles at their peaks and lag at cycle troughs), they provide confirming evidence of the direction of the U.S. economy.

C. Seasonal Adjustments and Annual Revisions

Over the course of a year, the weekly changes in the levels of initial claims and continued claims undergo regularly occurring fluctuations. These fluctuations may result from seasonal changes in weather, major holidays, the opening and closing of schools, or other similar events. Because these seasonal events follow a more or less regular pattern each year, their influence on the level of a series can be tempered by adjusting for regular seasonal variation. These adjustments make trend and cycle developments easier to spot. At the beginning of each calendar year, the Bureau of Labor Statistics provides the Employment and Training Administration (ETA) with a set of seasonal factors to apply to the unadjusted data during that year. Concurrent with the implementation and release of the new seasonal factors, ETA incorporates revisions to the UI claims historical series caused by updates to the unadjusted data.
