Benefit Accuracy Measurement
Methodology and Program Description

The Benefit Accuracy Measurement (BAM) program (before 1996 called Benefits Quality Control) is designed to determine the accuracy of paid and denied claims in three major Unemployment Insurance (UI) programs. It does this by reconstructing the UI claims process for samples of weekly payments and denied claims using data verified by trained investigators.

For claims that were overpaid, underpaid, or improperly denied, BAM determines the cause of and the party responsible for the error, the point in the UI claims process at which the error was detected, and actions taken by the claimant, agency, and employers prior to the error. For erroneous paid claims, BAM determines the amount of benefits the claimant should have received.

The results of the BAM statistical samples are used to estimate accuracy rates for the populations of paid and denied claims. In addition, BAM is a diagnostic tool for Federal and State Workforce Agency (SWA) staff to use in identifying systemic errors and their causes and in correcting and tracking solutions to these problems.

Coverage

BAM covers the three largest permanently authorized unemployment compensation (UC) programs: State UI, Unemployment Compensation for Federal Employees (UCFE), and Unemployment Compensation for Ex-Service Members (UCX). BAM data for paid claims are available for the 50 states, the District of Columbia, and Puerto Rico from January 1988 through the present. BAM Denied Claims Accuracy (DCA), which investigates the accuracy of denied UC claims, began in August 2001.

Sample Design

State BAM samples are randomly selected from the populations of UI, UCFE, and UCX payments and determinations denying eligibility issued by the state each week. BAM refers to this weekly sampling interval as a batch. Each batch begins at midnight Sunday and runs until 11:59 p.m. Saturday. BAM records the number of UI weeks and dollars that were paid in the population from which the sample was selected and the number of denied claims for DCA so that the sample data can be weighted to make inferences concerning the population.

Sample Sizes

Before 1997, BAM paid claims sample sizes ranged from 400 to 1800 cases per year per state. Since 1997, allocated sample sizes range from 360 cases per year in the 10 states with the smallest UI workloads to 480 cases in the remainder of the states. Several states have chosen to select larger samples. For DCA, states sample 150 cases for each of the three types of denials -- monetary, separation, and nonseparation.

Database

The BAM database includes about 110 data elements for each sampled payment or denial. Data for 15 of these elements are captured twice (before and after the investigation), and eight are completed only for erroneous payments or denials. Aggregate data for each batch are collected for 42 additional

data elements, most of which are demographic characteristics of the sample and population (Appendix A)

Methodology Considerations

Estimates based on BAM data are subject to the usual sampling and non-sampling errors that can affect survey data. BAM has implemented several quality assurance procedures to minimize non-sampling errors, such as testing for incomplete or improperly defined sampling frames, errors of interpretation and data entry errors. Nonresponse bias is not significant because of information from multiple sources. Nationally, BAM program staff gathered sufficient information from claimants, employers and third parties to complete their investigations for 97 percent of the UI payments that are sampled (response rates for DCA are lower); sample case completion rates are 100 percent in most states. When the program began, all BAM verifications were done in person. Since 1993, investigators may use telephone, mail (including email), and fax to collect their data. Studies have shown that although such methods yield somewhat less information than in-person contacts, the overall accuracy rate estimates are not significantly affected.

PIIA 2022-- BAM Case Completion and Percent of Claimant Interview Method								
Sample Type	Cases Sampled	Valid Cases *	Cases Complete **	Percent Complete	In-Person	Tele-Phone	Mail	No Clmnt. Inter.
Paid Claims	23,793	23,653	22,944	97.00%	0.70%	31.26%	43.48%	24.56%
Monetary	8,119	7,810	7,629	97.68%	0.44%	23.36%	18.55%	57.55%
Separation	7,833	7,760	7,578	97.65%	0.63%	26.75%	22.29%	50.28%
Nonseparation	7,934	7,729	7,548	97.66%	0.43%	27.85%	24.86%	46.78%

* Cases sampled minus cases deleted because they did not meet the definition for inclusion in the survey population and denied claims that were withdrawn by the claimant.
**To meet PIIA reporting timetables, the database was frozen on 10/31/2022. The number of valid cases completed is those signed off by the BAM program's supervisor by the close of business on 10/30/2022.

The attached excel spreadsheet provides state detail for the claimant interview methodology: PIIA_2022_Method_Claimant_Information_Obtained.xlsx

To evaluate the accuracy of each sampled payment, the BAM program investigates the UI claimant's monetary and separation eligibility, as well as all information relevant to the compensated week of unemployment that was sampled, including the claimant's availability for work, efforts to find suitable work, and earnings from casual employment or other income sources, such as Social Security or pensions. Investigations of denied claims are limited to the issue type for which eligibility was denied. For example, if a claimant was denied UC because of a voluntary quit separation issue, DCA will investigate only that issue, not the claimant's monetary or nonseparation eligibility. Both BAM paid and denied claims accuracy record demographic, UI program, and labor market data on each claimant. The BAM program does not maintain longitudinal data on the claimant's UI benefit history subsequent to the compensated week sampled.

Although claimant characteristics can be inferred from the data, it is important to keep in mind that the BAM paid claims sampling frames consist of payments. Claimants have an increased chance of selection to the BAM paid claims samples the longer they remain in the UI system and are paid benefits. Estimates of claimant characteristics that are correlated with duration of receiving benefits

are subject to bias unless they are weighted to take into account the claimant's probability of sample selection. The Department's approved improper payment rate computation methodology can be found in UIPL 09-13 Change 1 (January 27, 2015). Corrective action and integrity plans for FY 2023 are based on this computation methodology.

Payment Error Codes

Payment error codes are provided for both underpayments and overpayments; the codes provide for multiple actions taken for a single issue, multiple issues detected for a single case, and various extents of agreement or disagreement between BAM and other units in the UI system concerning official policy or actions taken for the sampled cases. The payment error coding system records findings of case investigations that reflect the state's law and official (written) policies. The BAM payment error coding system encompasses appealable actions taken by any state unit, including BAM, which modify actions taken on payment errors, e.g., monetary redeterminations, establishment of overpayments, etc. It encompasses actions in progress by units other than BAM on improper Key Week payments, of which actions BAM is in agreement. It also encompasses findings when no actions are permitted, e.g., because of state finality provisions.

BAM Integrity Rate Definitions

The following charts summarize the definitions for the integrity rates included in the BAM analyses.

Rate	Sample Type	Action Code	Cause
Overpayment* Rate (Rate shown without other SWA errors e.g. interstate activities [Excludes errors where Element (ei7) Prior Agency Action >=90]	1 - Paid Claims	10 - Fraud 11 - Nonfraud recoverable 12 - Nonfraud nonrecoverable Excludes errors with action codes: 13 - Technically proper due to finality rules 14 - Work Search Formal Warnings – instances where state policy requires a warning before issuing a denial of benefits for the failure to conduct an active search for work. 15 - Technically proper due to rules other than finality or formal warning rule 16 - Overpayment established which was later "officially" reversed, revised, adjusted, or modified and BAM disagrees with "official" action (e.g., Appeals unit reverses BAM determination and BAM disagrees).	All cause codes.
Overpayment** Rate with formal warnings (rate shown without other SWA errors (e.g. interstate activities errors)	1 - Paid Claims	10 - Fraud 11 - Nonfraud recoverable 12 - Nonfraud nonrecoverable 14 - Work Search Formal Warnings – instances where state policy requires a warning before issuing a denial of benefits for the failure to conduct an active search for work. Excludes error with element (ei7) Prior Agency Action >=90 Excludes errors with action codes:	All cause codes.

Rate	Sample Type	Action Code	Cause
		13 - Technically proper due to finality rules 15 - Technically proper due to rules other than finality or formal warning rule 16 - Overpayment established which was later "officially" reversed, revised, adjusted, or modified and BAM disagrees with "official" action (e.g., Appeals unit reverses BAM determination and BAM disagrees).	
Fraud	1 - Paid Claims	10 - Fraud	All cause codes.
Agency Responsibility* *Rate shown without other SWA errors (e.g. interstate activities)	1 - Paid Claims	10 - Fraud 11 - Nonfraud recoverable 12 - Nonfraud nonrecoverable Includes only those overpayments for which the agency had full or partial responsibility -- codes 30, 1030, 230, 34, 1230, 1034, 234, 1234.	All cause codes.
Underpayment	1 - Paid Claims	BAM investigation determines that the payment was too small: 20 - Supplemental check issued/offset applied or increase in weekly benefit amount (WBA), dependents' allowance (DA) entitlement, maximum benefit amount (MBA), or remaining balance (RB) Excludes errors with action codes: 21 - Technically proper due to finality rules 22 - Technically proper due to rules other than finality 23 - Supplemental check issued/offset applied which was later "officially" reversed, revised, adjusted, or modified, and BAM disagrees with the "official" action (e.g., Appeals unit reverses BAM determination and BAM disagrees) 24 - BAM determines payment was too small, but claimant is not entitled to payment due to collateral issues.	All cause codes.
BYE rate	1 - Paid Claims	10 - Fraud 11 - Nonfraud recoverable 12 - Nonfraud nonrecoverable 15 - Technically proper due to rules other than finality or formal warning rule	Cause Codes 100 through 119 and 150 through 159
Work Search Rate	1 - Paid Claims	10 – Fraud 11 - Nonfraud recoverable 12 - Nonfraud nonrecoverable	Cause codes 420 through 429
Work Search Rate including Formal Warnings	1 - Paid Claims	10 – Fraud 11 - Nonfraud recoverable 12 - Nonfraud nonrecoverable 14 - Work Search Formal Warnings – instances where state policy requires a warning before issuing a denial of benefits for the failure to conduct an active search for work.	Cause codes 420 through 429

Denied Claims			
Rate	Sample Type	Action Code	Cause
Improperly Denied	2 - Monetary 3 - Separation 4 Nonseparation	BAM investigation determines that the denial determination was improper or benefit payment was too small: 20 - Official agency action finds the claimant to be eligible for a supplemental check issued/offset applied or increase in WBA, DA, MBA, or RB 21 - Technically proper due to finality rules 22 - Technically proper due to rules other than finality 23 - Supplemental check issued/offset applied which was later officially reversed, revised, adjusted or modified, and BAM disagrees with the official action 24 - No payment is due to the claimant	For Action codes 20-23: All causes <u>except</u> 700 - 739. For Action code 24: 710-719: Claimant not entitled to benefits due to other issues affecting the claim 720-729: Claimant not entitled to benefits because no week was claimed (Codes valid only for Sample Type 3 or 4)
Adjusted Improperly Denied	2 - Monetary 3 - Separation 4 – Nonseparation	Same as Improperly Denied <u>minus</u>: Prior Agency Action codes 20-29: Agency was in the process of resolving issue and took correct action before DCA investigation completed or agency had correctly resolved issue prior to sample being selected – or – Results of Appeal of Initial Determination codes 1 - affirmed, eligible; or 3 - reversed, eligible	For Action codes 20-23: All causes <u>except</u> 700 - 739. For Action code 24: 710-719: Claimant not entitled to benefits due to other issues affecting the claim. 720-729: Claimant not entitled to benefits because no week was claimed (Codes valid only for Sample Type 3 or 4)
Overpayment	3 - Separation 4 – Nonseparation	Action codes 10-16	All causes <u>except</u> 700 - 739.
Properly Denied	2 - Monetary 3 - Separation 4 – Nonseparation	Action Code 30	Cause codes 700-709

Published Findings

The Department of Labor has published BAM data by state along with supplementary analyses annually since 1988. From 1988 to 1995, the report was called the Unemployment Insurance Benefits Quality Control Annual Report; 1996 data were published in the UI Benefit Accuracy Measurement Annual Report. Since 1997 BAM data have been published as part of the UI PERFORMS Annual Report, which also includes data from the Benefit Timeliness and Quality program and the Tax Performance System. The BAM Analytical Report and UI Performs Annual Report are available on

the U. S. Department of Labor Employment and Training Administration Office of Unemployment Insurance Web site – https://oui.doleta.gov/unemploy/bqc.asp.

Benefit Accuracy Measurement Employer Verification	Batch	Seq	Claim Type

Claimant Name:			Claimant SSN:
Employer:		Employer Acct #:	Contact Person:
Employer Address:		Phone:	Fax:

Claimant Hired on:	Separated on:	Last Day Worked:	States worked in:	Other SSN or Name used: while employed in last three years? ☐ Yes ☐ No If Yes, provide it:

Claimant provided I-9 Employment Eligibility Verification Information	☐ - US Citizen ☐ -Alien Authorized to Work ☐ - Lawful Permanent Resident	Alien #

Payroll: frequency? Circle answer(s): Daily, Weekly, Biweekly, Semi-Monthly, Monthly, Commission	Pay Period begins on what day of the week? And ends on what day?	Pay Day is on what day?

Recall ☐ Yes ☐ No Date?	Claimant actively employed? ☐ Yes ☐ No	Rate of pay when employed $_____ Per:	For requalification: total earnings since _____ = $

Type of work (Check all that apply) ☐ Full time ☐ Part Time ☐ Contract worker ☐ Federal ☐ Military ☐ Seasonally

Claimant Job title:	Claimant Job Responsibilities

Circle Separation type: Quit / Fired or Discharged for Misconduct / Permanent layoff –Reduction In Force / Temporary layoff / Still working / Retirement / Discharge - no misconduct (unable to perform) / Other compelling reasons (i.e. move with spouse, family illness)

Explain separations except lack of work/layoff.

If wages were for any time period after last day worked, please complete the following:

TYPE OF PAY	$ AMOUNT	# OF WEEKS	DATES COVERED
Accrued Vacation			
Holiday \ Sick			
Last Pay Period			
Commission \ Bonus			
Wages in Lieu of Notice			
Severance \ Separation Pay			
Pension - Employer contribution plan? Yes or No			

BASE PERIOD YEAR – FROM (/ /) TO (/ /)

IMPORTANT: *Please enter each pay period end date and gross pay for each payday in the quarter. If the amounts for all weeks do not match the original amount reported by you – please call!*	Year/Quarter:			Year/Quarter:		
	PAY PERIOD BEGIN AND END DATES	**PAYDAY**	**GROSS PAY**	**PAY PERIOD BEGIN AND END DATES**	**PAYDAY**	**GROSS PAY**
TOTAL AUDITED						

BASE PERIOD YEAR – FROM (/ /) TO (/ /)

IMPORTANT: *Please enter each pay period end date and gross pay for each payday in the quarter. If the amounts for all weeks do not match the original amount reported by you – please call!*	Year/Quarter: **PAY PERIOD BEGIN AND END DATES**	**PAYDAY**	**GROSS PAY**	Year/Quarter: **PAY PERIOD BEGIN AND END DATES**	**PAYDAY**	**GROSS PAY**
TOTAL AUDITED						

CLAIM BENEFIT YEAR EARNINGS – FROM (/ /) TO (/ /)

If you hired this person after the "from" date above, was this new hire reported to the New Hire Registry? ☐ Yes   ☐ No.

If yes, when _____ and to which state was the new hire reported _____.

If you did not report this person as a new hire, did you previously employ this person within the past 60 days? ☐ Yes   ☐ No.

IMPORTANT: *Please enter each pay period end date and gross pay for each payday in the benefit claim period shown above. If the amounts for all weeks do not match the original amount reported by you – please call!*	**PAY PERIOD BEGIN AND END DATES**	**PAYDAY**	**GROSS PAY**	**PAY PERIOD BEGIN AND END DATES**	**PAYDAY**	**GROSS PAY**
TOTAL AUDITED						

I certify that the above information is correct to the best of my knowledge and belief.

Database Description

<u>**Naming Conventions**</u>

The PCA and DCA system utilizes the following naming conventions within the UI database tables. **Note to Researchers**: The federal tables do not contain certain claimant personal identifying information fields and other state specific fields:

- Each table will have a prefix of **b_** or **b_dca_** The prefix's meaning is:

  'b_' = Paid Claim Accuracy and
  'b_dca_' = Denied Claims Accuracy.

- Each table will have similar suffix names.

The table suffix names are:

comparison	The data characteristics table provides aggregate sample and population data for several demographic data elements.
master	The primary table that consists of base record information.
errisu	The error issue table contains information on the cause, responsibility, point of detection, and other data elements for improper denials.
reopen	The reopen table contains a record of any modification to a master record after the record has been closed by the supervisor.
assigndate	The assignment table contains the investigator's case assignment information with respect to his/her master record.

Paid Tables

PAID CLAIMS ACCURACY TABLES	
Table Name	Table Type
b_comparison	Primary
b_master	Primary
b_errisu	Primary
b_assigndate	Primary
b_reopen	Primary

Denials Tables

DENIED CLAIMS ACCURACY TABLES	
Table Name	Table Type
b_dca_comparison	Primary
b_dca_master	Primary
b_dca_errisu	Primary

b_dca_assigndate	Primary
b_dca_reopen	Primary

In addition to the five primary DCA tables, DCA also utilizes tables used by BAM paid claims accuracy software: **b_uaf**, **b_qcslo**, **b_batch**, **b_cre**, and **b_vallim**.

Primary Keys for joining tables

FIELD	KEY	DEFINITION
Batch	Primary	Batch identifies the year (YYYY) and week (WW) of the record. The format of the field is: YYYYWW.
Seq	Primary	Primary Sequence Number identifies the record number within the batch by sample type. Range of values: 1 - 99. At least two (2) sample cases are required for each batch and sample type because of statistical validity requirements.
Serial Number	Primary	System assigned
Samptype	Primary	Sample Type identifies the specific record type within the batch. 1 - BAM paid claim 2 - Monetary denials 3 - Separation denials 4 - Nonmonetary nonseparation denials

Example: **batch** = 202203; **seq** = 3; **samptype** = 2 identifies the record as the third sampled monetary denied case within the third week of 2022.

Example of PCA case weighting for each batch and each case completed.

BATCH	nh = Batch Week numbers of weekly original payments made (cm2)	mh = BAM batch Week number random samples requested, and investigation completed	Batch weight (WT) = nh/ mh	PD = dollars paid in BAM sample Cases	WT_PD = WT times sample dollars PD	EXC = dollars paid in BAM sample cases (dollar amount of batch sample cases with (c1) program = 8 0r 9	WT_EXC Dollars excluded (c1) = 8 or 9 times weight	POP = dollars paid in Population Cases

The following section identifies the elements contained in the state database. The federal database tables may have a slightly different element organization and excludes personal identifying information that may be contained in the state database tables. Please see the ET Handbook No. 395 for element definitions and coding options for each.

BAM DATA ELEMENTS

Note: UIPL No. 25-20 introduced a number of field size changes and the redefinition of element (d7).
