

# Unemployment Insurance (UI) Nonmonetary Determinations

4<sup>th</sup> Quarter of 2021

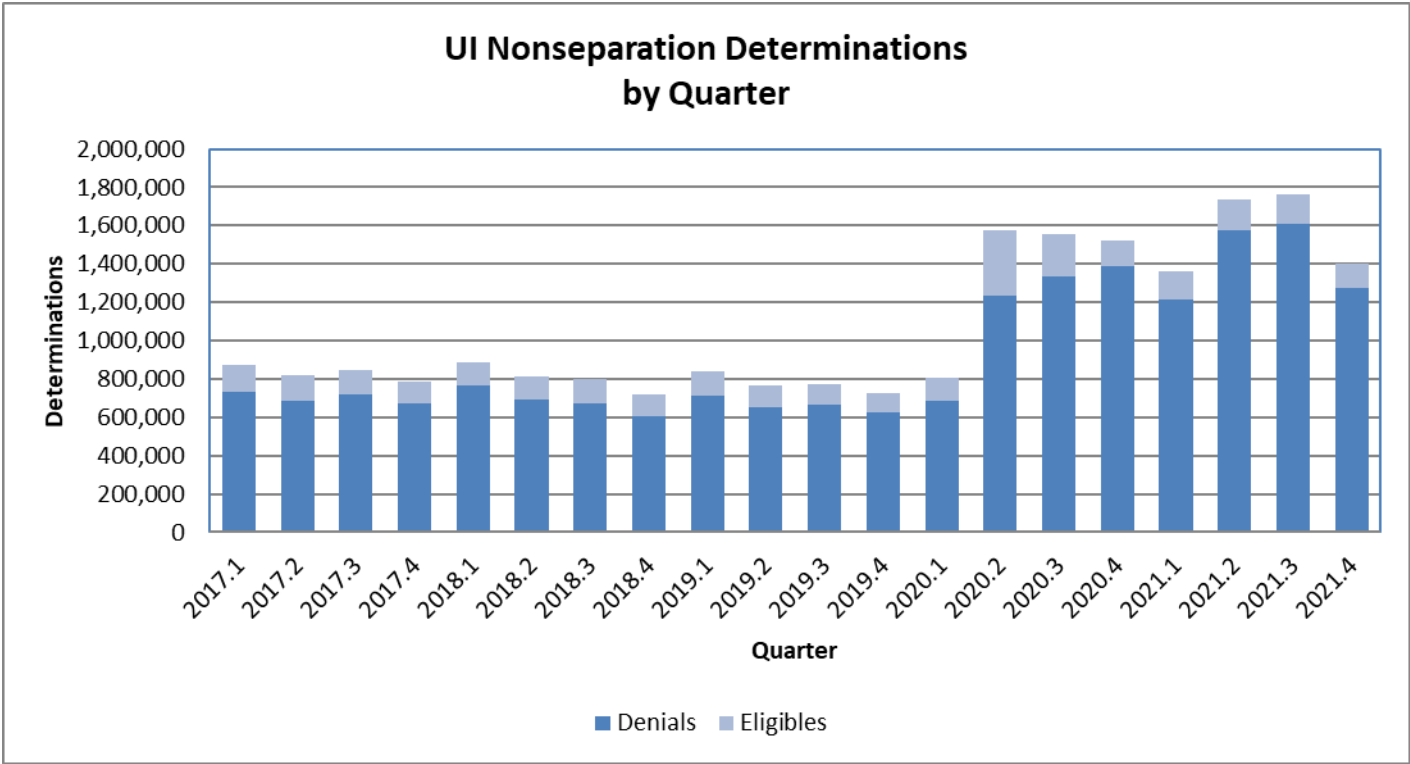

## Workload

In the 4th quarter of 2021, the number of UI nonmonetary determinations decreased 15.5% from the previous quarter. The number of separation determinations decreased by 4.5% and the number of nonseparation determinations increased by 20.5%. However, even though these categories show decreases in this quarter, workload remains slightly higher than the same quarter in 2020 due to the impact of Covid-19 on state workload.

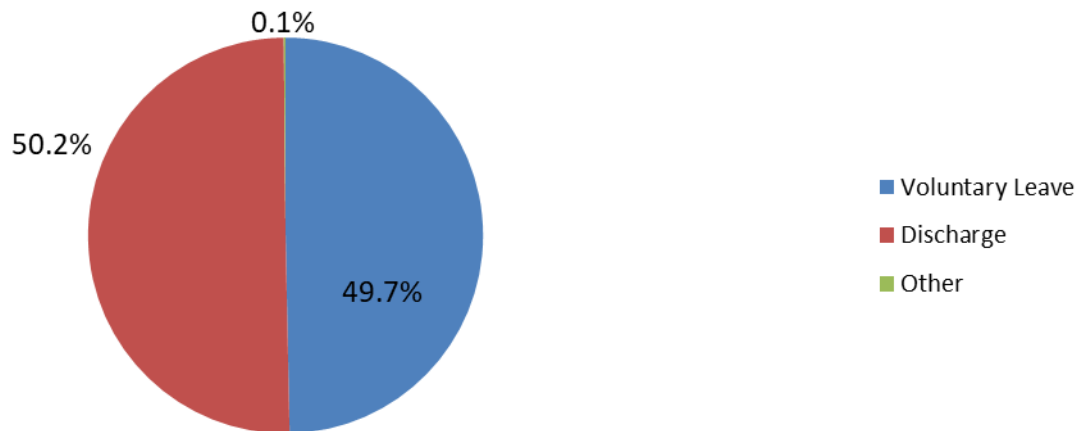

In the 4<sup>th</sup> quarter of 2021, 57.3% of the determinations involving separation issues resulted in a denial of UI benefits, and 42.7% of the determinations concluded that the claimant was eligible for benefits. This ratio in the 4<sup>th</sup> quarter of 2021 is still concluding that most determinations claimants are eligible for benefits.

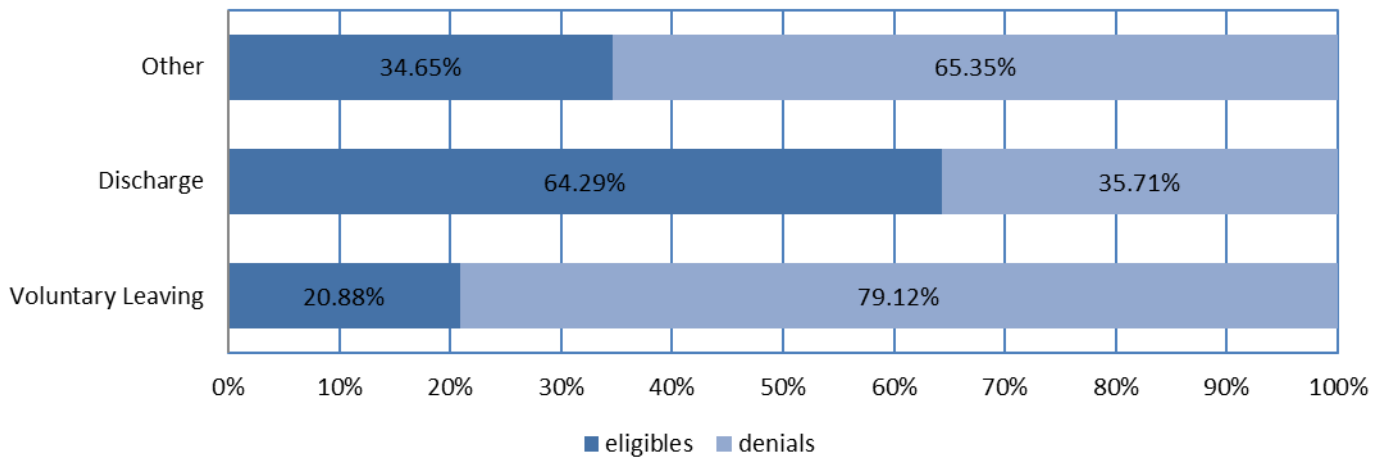

In the 4<sup>th</sup> quarter of 2021, 91.2% of the determinations involving nonseparation issues resulted in a denial of UI benefits, while the claimant was found to be eligible for benefits in only 8.9% of nonseparation determinations. Although workload increased significantly starting with the 2<sup>nd</sup> quarter of 2020 due to the impact of Covid-19, the ratio of denials to eligible claims remains similar for nonseparation issues.

### UI Separation Determinations Issues 4th Quarter 2021

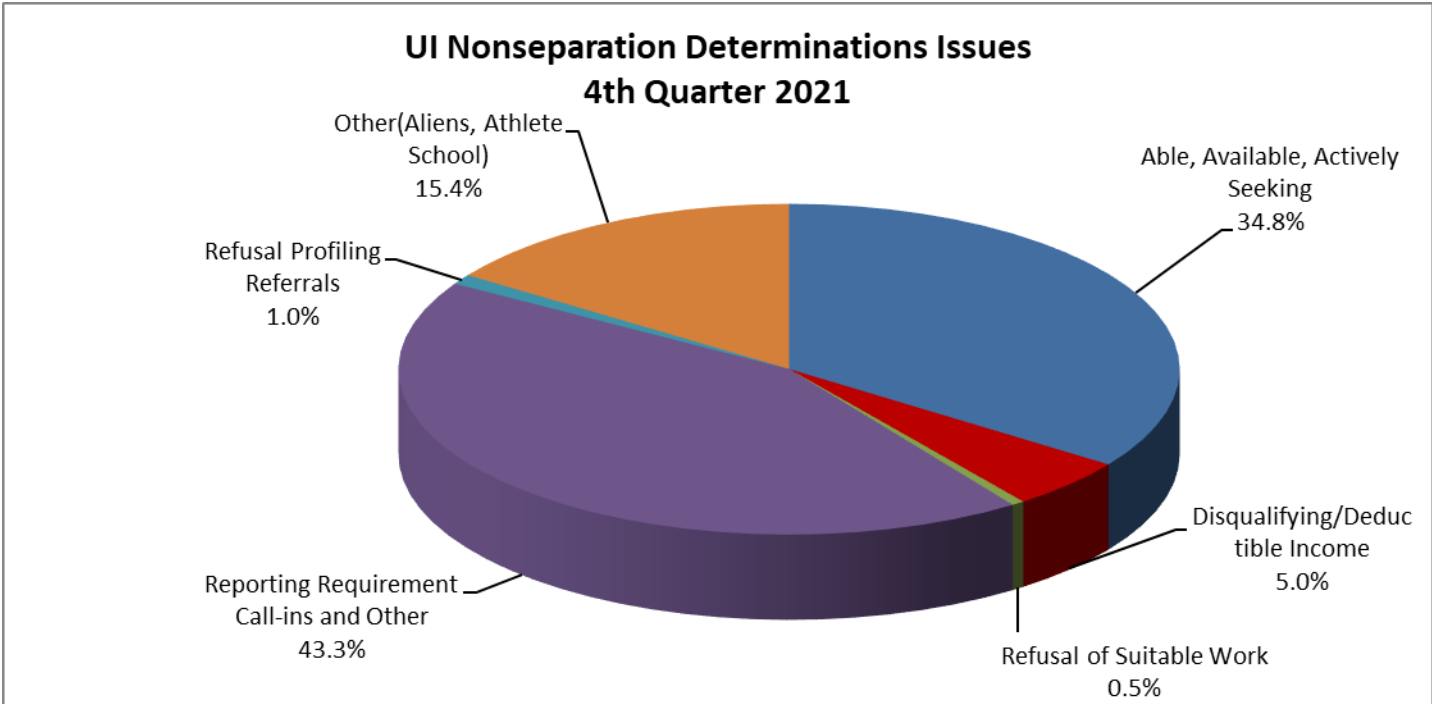

In the 4<sup>th</sup> quarter of 2021, 50.2% of the determinations involving separation issues due to discharge, 49.7% were due to voluntary leave, and 0.1% due to other reasons. This differs from results in 2019 and earlier, where separations due to discharge accounted for the majority of separation types.

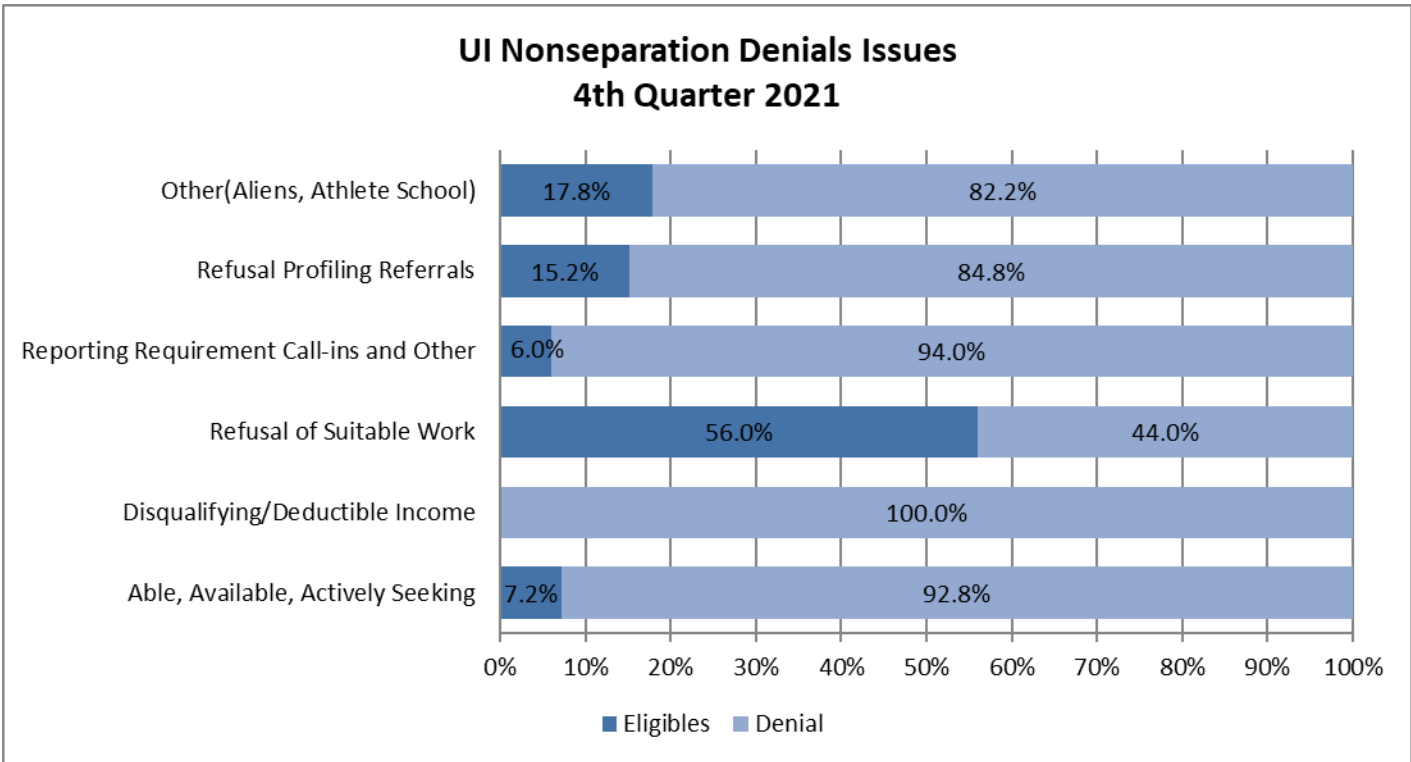

### UI Separation Denials Issues 4th Quarter 2021

In the 4<sup>th</sup> quarter of 2021, 79.1% of the determinations where the claimant voluntary left the job, resulted in a denial of eligibility. In contrast, states issued denials for only 35.7% of the determinations where the claimant was discharged from the job.

In the 4<sup>th</sup> quarter of 2021, the largest category of nonseparation determinations (43.3%) was the reporting requirement call-ins and other. The second largest category (34.8%) was able, available, actively seeking employment. This differs from 2019 and earlier, where the largest category was “able, available, actively seeking” and the second largest category was “reporting requirement, call-ins and other”.

In the 4<sup>th</sup> quarter of 2021, the category of nonseparation determinations with the highest denial rate was “Disqualifying/Deductible Income” with 100%, followed by “Reporting Requirement Call-ins and Other” with 94% and “Able, Available, Actively Seeking” with 92.8%.
