Evaluating State Unemployment Insurance (UI) Tax Systems Using the Significant Tax Measures Report

Introduction

The publication of the yearly report of Significant Measures of a State UI Tax System provides an opportunity for interested users to evaluate and compare the primary functions of a state's UI tax structure. The wide range of methodologies and application of UI taxes across states creates a growing need to measure the differences and workings of these systems. This report fills that need by offering a series of useful and comparable metrics.

The following description is provided to assist users of this new report in interpreting and using the report information to effectively evaluate a state's UI tax structure. The twenty-two variables in this report are divided into four sections. The first eight variables provide the **State Tax Structure Description**, the next six items cover the state's **Contribution Levels**, followed by five variables on **Benefit Charging** measures, and concluding with four items on the **Distribution of Wages, Benefits, and Contributions**.

State Tax Structure Description

Items in this section provide an overview of the applicable laws for each state's UI tax structure, together with the average tax rate in the state and the current solvency level.

Each state has the legal authority to set the type of **experience rating method** to apply in the formulation of employers' tax rates. The majority of states, thirty-three, use the Reserve Ratio experience rating methodology, the only method which gives credit to employers for the amount of contributions they have made. Seventeen states use the Benefit Ratio method, two states use the Benefit Wage Ratio method, and one state employs the Payroll Decline method.

In addition to the type of experience rating method, states differ in the **type of employer ranking** employed in the assignment of tax rates, eleven states assign UI tax rates by using a relative ranking of all employers, called the Array Method. Essentially these states assign tax rates based on how employers compare against each other in terms of their experience with unemployment, however measured. The remaining 42 states all use **fixed intervals** of their experience rating measure (e.g.

reserve ratio) to place employers in tax rate groups. The Array Method pre-determines the proportion of taxable wages that will be assigned any specific tax rate which allows states to predetermine the level of contributions they will receive.

Of the states that charge a claimant's benefits back to an employer (three states do not charge benefits at all) all use one of three **types of charging methods** for claimants with multiple recent employers. Thirteen states charge the most recent or principal employer on the theory that this employer has primary responsibility for the unemployment. Based on the belief that unemployment results from general conditions of the labor market more than from a given employer's behavior, the largest number of states, thirty-four, charge employers in proportion to the base period wages earned. Five states charge base period employers in inverse chronological order, generally up to a specified percentage of base period wages.

The **average tax rate** is calculated by dividing the total contributions of taxable employers by taxable or total wages. It represents the average rate an employer would face in the state. The **statutory minimum rate** is the tax rate on taxable wages that is assigned to those employers with the best experience rate those laying off the fewest employees, the **maximum rate** is the rate on taxable wages that is assigned to the employers laying off the most employees.

The **new employer rate** applies to firms from one to three years and the specifics of each state rate can be found in the appendix.

Contribution Levels

Every state varies the level of its tax rates based on its UI trust fund balance and the application of experience rated reductions and increases. The average tax rate is one measure of the overall level of contributions. The **contribution per covered employee** translates the average tax rate into a dollar figure to give a nominal view of this rate. Likewise, the **estimated employer contribution for every dollar of wages paid** shows the portion of wages that employers are paying in UI taxes, with most all states below one cent. This amount signifies, on average, how much each taxable employer is paying yearly in taxes for each job. States with higher average contribution levels are collecting higher amounts, but they also may be paying higher levels of benefits or may have lower solvency levels, which can also be compared in this report.

Just comparing the minimum and maximum statutory tax rates in effect across states is not a clear indication of the applicable ranges in effect because each state may have

a different taxable wage base. The **estimated contributions per employee at the tax base** identifies the amount an employer **assigned the minimum rate** would pay for an employee earning at least the taxable wage base. A few states may have a zero value if the rates in effect for that year have a zero tax rate for the lowest rate applicable. Likewise, **contributions at the maximum rate** provides the amount an employer would pay for each employee earning at least the taxable wage base if they are assigned the maximum tax rate. The lowest amount a maximum-rated employer would pay per year is \$378 (5.4% times \$7,000 wage base) a year. The **average contribution per employee at the tax base provides** the average dollar amount each employer is paying for an employee at the tax base.

To reasonably compare the range of the per employee cost and compare in effect the differences in slope of each state's tax schedule, the metric of the **average increase in an Employer's Per Employee tax for incurring Benefit Charges Equivalent to 1% of its taxable payroll** is included. This measure gives an employer a reasonable expectation of the change in their tax amount (per employee) when they make layoffs of a certain level. This measure increases for states that have a wider range of applicable tax rates and a higher taxable wage base - meaning rates will increase more for each layoff by an employer.

States are continually paying UI benefits and receiving UI contributions with the difference between these monies being deposited or withdrawn from the UI trust fund. One way to compare the incoming and outgoing flows is to reduce the yearly totals to per dollar values by computing the ratio of benefits to contributions. This shows what happens to each dollar of contributions. For the **amount going to pay benefits in the previous computation year**, a value greater than one dollar means that benefits were greater than contributions and the difference is being taken **from the UI trust fund**. If the value is less than one, contributions are greater than benefits and the remaining amount is being put **into the UI trust fund**. During periods of high unemployment and high solvency, states may reasonably have values above one, and during periods of low unemployment and low solvency, states will reasonably be expected to have values below one. Values opposite of these expectations may be a matter of concern and merit further examination.

Also, to capture the solvency impact of the varying tax rate assignment in Experience Rating a comparison is made between the average tax rate of the current state distribution of tax rates against the average tax rate for an **Adequate level of Financing (AFR)**. The adequate level of financing is calculated as the rate equal to the amount needed to cover benefit payments (average level of last six years) plus a

solvency amount (difference between trust fund (including loans) and Adequate Fund (1.0AHCM)).

The **percentage difference from the Adequate Financing Rate** shows how the state's current level of financing compares to the determined adequate level. A large negative number corresponds to a level of financing that is well below adequate.

This measure can be combined with the level of solvency (Average High Cost Multiple) to suggest that a state may have an inadequate level of taxation if to fund their program if they have a large negative difference from the adequate financing rate and a low level of solvency.

Benefit Charging

All but three states charge the benefits paid back to a so called "responsible" employer. The amount states **charge to active employers'** experience rating accounts varies tremendously among states (between 50 and 90 percent of total benefits paid). It is important to note that the amount of benefits attributed to individual employer accounts is not the amount employers will pay in UI taxes, but only the amount used in the formulation of their final tax rates. It is also necessary to look at how closely the assigned tax rates reflect employer experience. Thus, a state with a relatively higher level of benefit charging than another state does not necessarily have a greater degree of experience rating.

The benefit charging levels are important for comparing yearly fluctuations in each category and comparing against estimated overall contribution levels. A growing proportion of **non-charged benefits** may indicate either a significant law change or a greater use of existing non-charging provisions. The level of **Inactive charges** shows the amount of benefits that have been charged to employers that are no longer considered active employers. A large proportion of inactive charges may indicate more turbulent economic conditions or a changing pattern of employment composition.

For any insurance scheme that caps the payment amount of the worst rated participants there will be a difference between the **amount these maximum tax rate employers are charged in benefits in the prior year and the estimated amount these employers pay in contributions during the current year**. The amount of contributions from these employers is shown as a **percentage of their charged benefits**, with a lower percentage corresponding to less re-coupment (but higher "insurance"). The difference between these two values is referred to as ineffective

charges the amount is also shown as a **percentage of total benefits paid** to reflect the importance of this level to the entire program. A higher percentage would indicate a more serious issue of funding that would need to be addressed.

Distribution of Wages, Benefits, and Contributions

Using only the average tax rate to measure the tax burden can disguise a good deal of the actual distribution of tax rate assignment. Since for any single variable the data can be grouped in any number of various patterns above and below an average rate, displaying the actual distribution provides a much finer comparison.

The scale used for each variable distribution in this report is the so called effective tax rate or tax rate on total wages. It is derived by dividing total contributions for the year by the total wages. Effective tax rates are comparable across states because they are not affected by differences in the taxable wage base.

A high **proportion of total wages** located under the lowest rates (0 - .5%) indicates employers with a high proportion of wages have very low tax rates. A high proportion of wages at the highest interval of > 2.0% indicates a large proportion of wages for employers assigned higher tax rates.

There will be small differences between the **distribution of total wages** and the distribution of taxable wages depending on the level of the tax base. For states with a high taxable wage base the difference between the distributions of taxable and total wages should be relatively small, while the distribution of taxable wages for a low taxable wage base state should reveal the differences between high wage and low wage employers.

The **proportion of accounts** at each rate interval indicates the number of employers taxed at each interval. A larger share of wages than accounts in any one interval means a greater share of larger and/or higher-wage employers located at that interval, while a smaller share of wages than accounts in any one interval means a greater share of smaller and/or lower-wage employers located there.

Comparing the **distribution of benefits charged** to the **distribution of contributions** provides a further insight into the allocation of costs to those employers deemed “responsible.” All states will have a higher proportion of benefits charged in the highest tax categories compared to the proportion of contributions received at this interval, indicating the limited liability of the worst rated employers. Often those

states with the largest difference between these distributions at the highest intervals also have a comparably large and opposite difference between the contributions received and benefits charged at the lowest levels in order to adequately fund their programs.

A precise definition of each measure can be found in the Data Definitions section at the end of the report.

ALASKA 2012

1) Type of Experience Rating Method:	Payroll Decline	2) Type of Employer Ranking:	Array
3) Type of Charging Method:	None	4) Taxable Wage Base (\$):	35,800
5) Avg. Tax Rate (Total / Taxable Wages) %:	1.86 / 3.04	6) New Employer Tax Rate (%):	2.4
7) Statutory Tax Rate (Minimum / Maximum)%:	1.31 / 5.40	8) Average High Cost Multiple (1/1/2012):	0.92

Contribution Levels			
	Per Covered Employee	For Every \$100 of Wages Paid	
9) Employer Contributions:	\$914	Minimum Rate	Average Rate Maximum Rate
10) Estimated Contributions Per Employee at the Tax Base:	\$469	\$1,089	\$1,933
11) The Average Increase in an Employer's Tax Amount Per Benefits Charged Equivalent to 1% of its Taxable Payroll ¹ :	\$70 Per Employee at the Tax Base		
12) For Every One Dollar of Contributions the Amount Going:	To Pay Benefits in Previous Comp. Year \$0.73	Into the Trust Fund \$0.27	
13) Average Tax Rate Compared to Adequate Financing Rate ² :	Adequate Financing Rate 2.14%	Current Avg. Tax Rate 3.04%	% Difference From Adeq. Finan. Rate 43%

Benefit Charging			
	Amount (\$mil.)	% of Total Benefits	Amount Per Employee
14) Benefits Charged to Active Taxable Employers:	0	0%	\$0
15) Benefits Non-Charged:	164	91%	\$686
16) Benefits Charged to Inactive Employers:	0	0%	\$0
17) Total Reimbursable Benefits Paid	15	9%	
Total:	\$179	100%	\$686
18) Benefits Charged to Employers at the Maximum Tax Rate in Excess of the Estimated Contributions from those Employers:	NA	NA	Est. Contributions from Max. Rated Employers as a % of their Charged Bens. NA

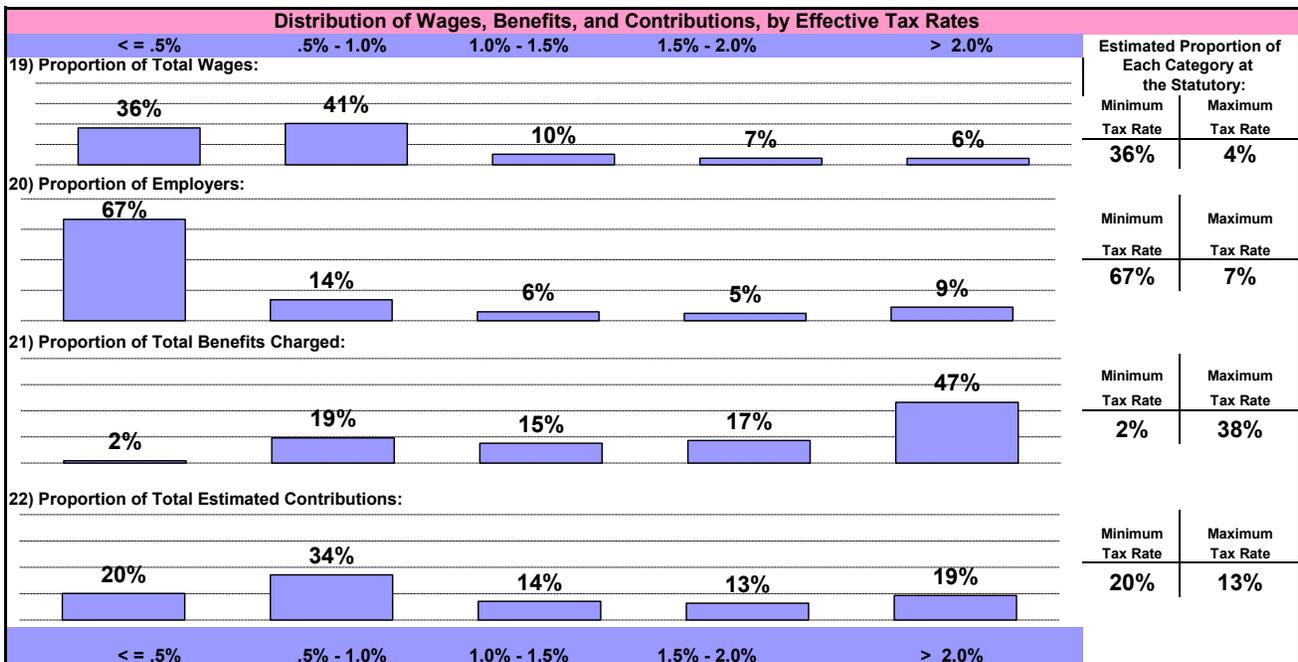

¹ Applicable for all employers (except those already assigned the minimum tax rate in a Reserve Ratio Experience Rating State) up to the maximum per employee cost (item 10).
² Adequate Financing Rate includes the amount needed to repay any outstanding state advances as of 1/1/2011

ALABAMA 2012

1) Type of Experience Rating Method:	Benefit Ratio	2) Type of Employer Ranking:	Fixed
3) Type of Charging Method:	Proportionally	4) Taxable Wage Base (\$):	8,000
5) Avg. Tax Rate (Total / Taxable Wages) %:	0.71 / 3.13	6) New Employer Tax Rate (%):	2.7
7) Statutory Tax Rate (Minimum / Maximum)%:	0.59 / 6.74	8) Average High Cost Multiple (1/1/2012):	0.00

Contribution Levels			
	Per Covered Employee	For Every \$100 of Wages Paid	
9) Employer Contributions:	\$292	\$0.71	
10) Contributions Per Employee at the Tax Base:		Minimum Rate \$47	Average Rate \$250
		Maximum Rate \$539	
11) The Average Increase in an Employer's Tax Amount Per Benefits Charged Equivalent to 1% of its Taxable Payroll1:	\$68		Per Employee at the Tax Base
12) For Every One Dollar of Contributions the Amount going:	To Pay Benefits in Previous Comp. Year \$0.96		Into the Trust Fund \$0.04
13) Average Tax Rate Compared to Adequate Financing Rate ² :			% Difference From Adeq. Finan. Rate
	Adequate Financing Rate ▼ 2.82%	Current Avg. Tax Rate ▼ 3.13%	11%

Benefit Charging			
	Amount (\$mil.)	% of Total Benefits	Amount Per Employee
14) Benefits Charged to Active Taxable Employers:	337	79%	\$237
15) Benefits Non-Charged:	50	12%	\$35
16) Benefits Charged to Inactive Employers:	17	4%	\$12
17) Total Reimbursable Benefits Paid	20	5%	
Total:	\$424	100%	\$284
18) Benefits Charged to Employers at the Maximum Tax Rate in Excess of the Estimated Contributions from those Employers:	\$115	28%	32%

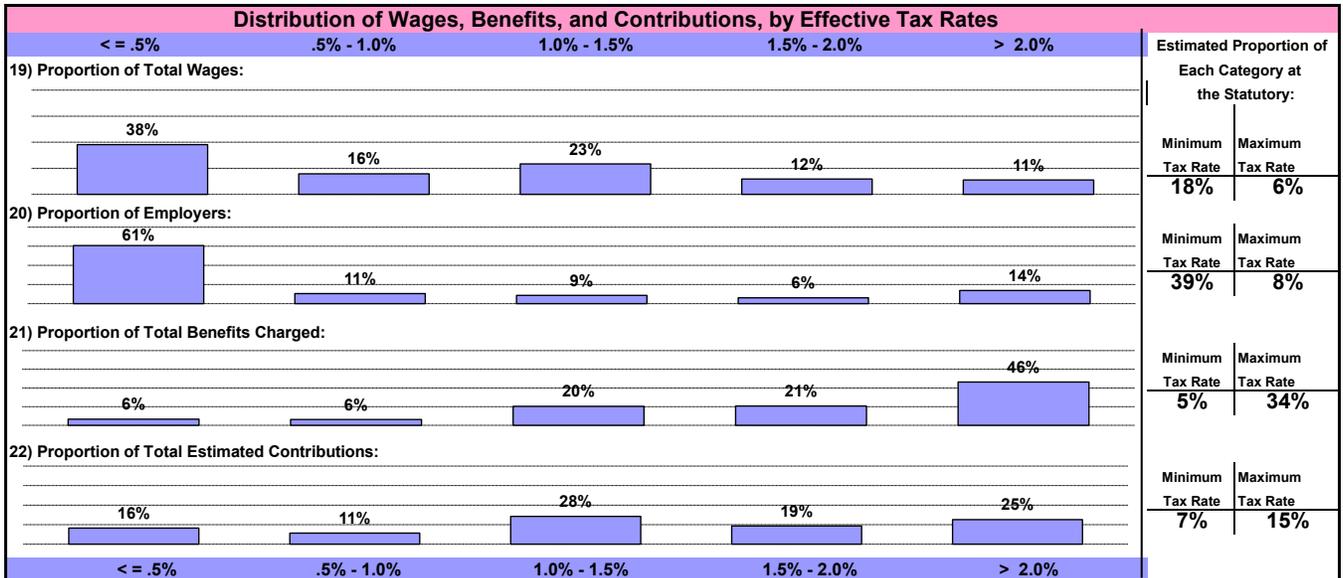

1 Applicable for all employers (except those already assigned the minimum tax rate in a Reserve Ratio Experience Rating State) up to the maximum per employee cost (item 10).
 2 Adequate Financing Rate includes the amount needed to repay any outstanding state advances as of 1/1/2011

ARKANSAS 2012

1) Type of Experience Rating Method: Reserve Ratio	2) Type of Employer Ranking: Fixed
3) Type of Charging Method: Proportionally	4) Taxable Wage Base (\$): 12,000
5) Avg. Tax Rate (Total / Taxable Wages) %: 1.19 / 3.48	6) New Employer Tax Rate (%): 4.0
7) Statutory Tax Rate (Minimum / Maximum) %: 1.20 / 7.10	8) Average High Cost Multiple (1/1/2012): 0.00

Contribution Levels			
9) Employer Contributions:	Per Covered Employee \$446	For Every \$100 of Wages Paid \$1.19	
10) Contributions Per Employee at the Tax Base:	Minimum Rate \$144	Average Rate \$418	Maximum Rate \$852
11) The Average Increase in an Employer's Tax Amount Per Benefits Charged Equivalent to 1% of its Taxable Payroll ¹ : \$54 Per Employee at the Tax Base			
12) For Every One Dollar of Contributions the Amount Going:		To Pay Benefits in Previous Comp. Year \$0.91	Into the Trust Fund \$0.09
13) Average Tax Rate Compared to Adequate Financing Rate ² :			
	Current Avg. Tax Rate 3.48%	Adequate Financing Rate 3.90%	% Difference From Adeq. Finan. Rate -11%

Benefit Charging			
	Amount (\$mil.)	% of Total Benefits	Amount Per Employee
14) Benefits Charged to Active Taxable Employers:	276	71%	\$307
15) Benefits Non-Charged:	85	22%	\$94
16) Benefits Charged to Inactive Employers:	7	2%	\$7
17) Total Reimbursable Benefits Paid	19	5%	\$19
Total:	\$386	100%	\$409
18) Benefits Charged to Employers at the Maximum Tax Rate in Excess of the Estimated Contributions from those Employers:			Est. Contributions from Max. Rated Employers as a % of their Charged Bens. 70%

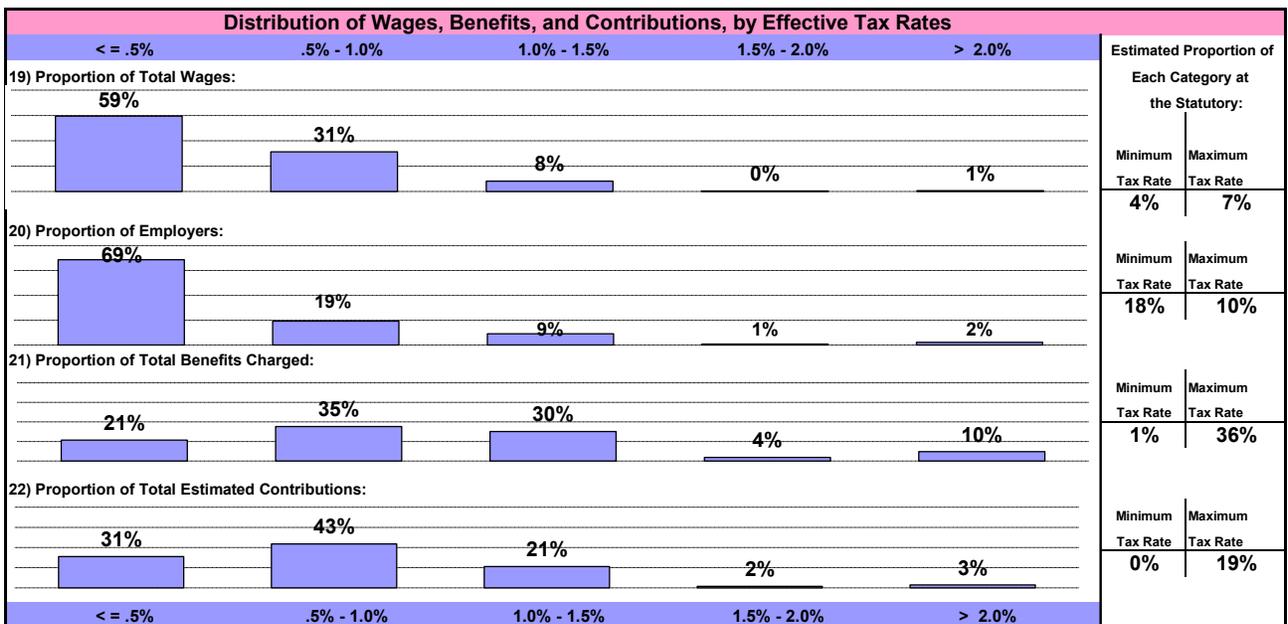

1 Applicable for all employers (except those already assigned the minimum tax rate in a Reserve Ratio Experience Rating State) up to the maximum per employee cost (item 10).
 2 Adequate Financing Rate includes the amount needed to repay any outstanding state advances as of 1/1/2011

ARIZONA 2012

1) Type of Experience Rating Method:	Reserve Ratio	2) Type of Employer Ranking:	Fixed
3) Type of Charging Method:	Proportionally	4) Taxable Wage Base (\$):	7,000
5) Avg. Tax Rate (Total / Taxable Wages) %:	0.46 / 2.35	6) New Employer Tax Rate (%):	2.0
7) Statutory Tax Rate (Minimum / Maximum)%:	0.02 / 6.38	8) Average High Cost Multiple (1/1/2012):	0.00

Contribution Levels			
	Per Covered Employee	For Every \$100 of Wages Paid	
9) Employer Contributions:	\$206	\$0.46	
10) Contributions Per Employee at the Tax Base:	Minimum Rate \$1	Average Rate \$165	Maximum Rate \$447
11) The Average Increase in an Employer's Tax Amount Per Benefits Charged Equivalent to 1% of its Taxable Payroll ¹ :	\$19 Per Employee at the Tax Base		
12) For Every One Dollar of Contributions the Amount Going:	To Pay Benefits in Previous Comp. Year \$1.35	Into the Trust Fund -\$0.35	
13) Average Tax Rate Compared to Adequate Financing Rate ² :	Current Avg. Tax Rate 2.35%	Adequate Financing Rate 3.46%	% Difference From Adeq. Finan. Rate -32%

Benefit Charging			
	Amount (\$mil.)	% of Total Benefits	Amount Per Employee
14) Benefits Charged to Active Taxable Employers:	442	67%	\$232
15) Benefits Non-Charged:	67	10%	\$35
16) Benefits Charged to Inactive Employers:	36	5%	\$19
17) Total Reimbursable Benefits Paid	113	17%	
Total:	\$657	100%	\$286
18) Benefits Charged to Employers at the Maximum Tax Rate in Excess of the Estimated Contributions from those Employers:	74	14%	Est. Contributions from Max. Rated Employers as a % of their Charged Bens. 51%

1 Applicable for all employers (except those already assigned the minimum tax rate in a Reserve Ratio Experience Rating State) up to the maximum per employee cost (item 10).

2 Adequate Financing Rate includes the amount needed to repay any outstanding state advances as of 1/1/2011

CALIFORNIA 2012

1) Type of Experience Rating Method:	Reserve Ratio	2) Type of Employer Ranking:	Fixed
3) Type of Charging Method:	Proportionally	4) Taxable Wage Base (\$):	7,000
5) Avg. Tax Rate (Total / Taxable Wages) %:	0.83 / 5.28	6) New Employer Tax Rate (%):	3.4
7) Statutory Tax Rate (Minimum / Maximum)%:	1.50 / 6.20	8) Average High Cost Multiple (1/1/2012):	0.00

Contribution Levels			
	Per Covered Employee	For Every \$100 of Wages Paid

New Employer Tax Rates**2012**

State

ALASKA	Average industry rate, or average for all employers if undetermined industry.
ALABAMA	2.7%
ARKANSAS	3.80%
ARIZONA	2.0%
CALIFORNIA	3.4%
COLORADO	Greater of 1.7%, actual rate if higher. Construction industry pays average industry rate.
CONNECTICUT	3.70
DISTRICT OF COLUMBIA	2.7%, or average rate for all employers if higher.
DELAWARE	Average "Assessment Rate" (2.6%). Construction employers pay an average industry rate.
FLORIDA	2.7%
GEORGIA	2.62
HAWAII	4.00
IOWA	1.9%, new construction employers pay 8.0%.
IDAHO	3.36%
ILLINOIS	3.80, or average industry rate if higher.
INDIANA	2.5%, 1% for government employers.
KANSAS	4.0%, construction employers pay 6.0%
KENTUCKY	2.7%, foreign and domestic construction firms receive maximum rate.
LOUISIANA	Up to 6.2% based on average industry rate.
MASSACHUSETTS	2.83%, new construction employers pay industry average.
MARYLAND	2.6%. Foreign contractors assigned average industry rate.
MAINE	3.02%, or "Predetermined Yield" if higher.
MICHIGAN	2.7%, Construction employers receive industry rate.
MINNESOTA	2.91%
MISSOURI	3.51%, or rate assigned to industry division.
MISSISSIPPI	2.7%
MONTANA	Average Industry Rate.
NORTH CAROLINA	1.2%
NORTH DAKOTA	1.37%
NEBRASKA	2.50%
NEW HAMPSHIRE	3.7%
NEW JERSEY	2.80%
NEW MEXICO	2.0%
NEVADA	2.95%
NEW YORK	Highest rate assigned to employers with positive account balances or 4.10%, whichever is less.
OHIO	2.7%, or average industry rate if higher.
OKLAHOMA	1.0%
OREGON	3.0%
PENNSYLVANIA	3.7030%, new construction employers pay 9.2%.
PUERTO RICO	3.0%
RHODE ISLAND	2.46 or higher of 1.0% or the state's five year benefit cost rate up to 4.2%.
SOUTH CAROLINA	2.87%
SOUTH DAKOTA	1.2% for 1st year; 1.0% for 2nd if positive balance.
TENNESSEE	2.7%, except average industry rate for selected high experience rated industries.
TEXAS	Greater of 2.7% or industry rate.
UTAH	Average Industry Rate up to 9.5%.
VIRGINIA	3.17%
VIRGINISLANDS	3.00%
VERMONT	Average industry rate, between 1.0% and 8.4%.
WASHINGTON	115% of the industry average
WISCONSIN	3.6% for larger employers. New construction employers pay 6.6%.
WEST VIRGINIA	2.7%; Construction and foreign entities pay 7.5%.
WYOMING	Average Industry Rate not less than 1.0%.

Significant Measures of State Unemployment Insurance Tax Systems

Data Definitions

Following are the definitions used for all of the items reported on the Significant Measures of State Unemployment Insurance Tax Systems report. The data used for this publication comes from individual state law publications and from the ETA-204 Experience Rating Report submitted yearly by all state agencies.

- | | |
|---|---|
| 1) Type of Experience Rating Method: | Method used to measure employers' experience with unemployment. There are currently four methods: Reserve Ratio, Benefit Ratio, Benefit Wage Ratio, and Payroll Decline. |
| 2) Type of Employer Ranking: | A "Fixed" measure of rating employers' experience has predefined intervals for the assignment of tax rates. An "Array" ranking method ranks all of the employers against each other before assigning tax rates. |
| 3) Type of Charging Method: | If a claimant has multiple recent employers, states determine the benefits attributable to a specific employer in three ways: 1) proportionally according to the amount of wages earned from each base period employer, 2) in inverse order based on wages earned, or 3) the most recent employer. |
| 4) Taxable Wage Base: | The maximum amount of an employee's total wages that is taxable. |
| 5) Statutory Tax Rates (Minimum and Maximum): | Minimum statutory rate is the lowest rate (on taxable wages) assigned in law to any employer for the year of the report. Maximum is the highest tax rate (on taxable wages) assigned to an employer for the year of the report. |
| 6) New Employer Tax Rate: | The tax rate assigned to newly established employers who do not have enough experience to qualify for a variable rate (also Ineligible Rate). |
| 7) Average Tax Rate (on Total Wages/
Taxable Wages): | The estimated total contributions received by the state divided by the total wages for the year. Average Tax Rate on Taxable Wages is the estimated total contributions received divided by the total taxable wages for the year. |

- 8) Average High Cost Multiple (AHCM):** The calendar year reserve ratio (year ending UI Trust Fund balance divided by total wages for the calendar year) divided by the Average High Cost Rate (average of the three highest calendar year benefit cost rates in the last twenty years -- or a period including three recessions, if longer).

Contribution Level

- 9) Employer Contributions:** Per Covered Employee: Total amount of contributions for the year divided by the number of covered workers for the same period. For Every One Dollar of Wages Paid: The average tax rate on total wages (%) divided by 100.
- 10) Contributions per Employee at the Taxable Wage Base (Minimum/Average/Maximum)** The state taxable wage base multiplied by the specific statutory tax rate: Minimum: the taxable wage base times the minimum tax rate in effect for the year. Average: the taxable wage base times the average tax rate (on taxable wages). Maximum: the taxable wage base times the maximum tax rate in effect that year.
- 11) The Average Increase in an Employer's Per employee Tax for Incurring Benefit Charges Equivalent to 1% of its Taxable Payroll.** The difference between the maximum per employee cost at the tax base and the minimum per employee cost, divided by the difference between the experience rating percent (either Reserve Ratio or Benefit Ratio) corresponding to the maximum statutory tax rate and the experience rating percent corresponding to the minimum statutory tax rate.
- 12) For Every One Dollar of Contributions Received the Amount Going: To Pay Benefits in the Previous Computation Year or Into the Trust Fund.** The amount going to pay benefits is the total benefits in the previous computation year divided by the total contributions in the report year. The amount going into the trust fund is the previous amount subtracted from \$1.00 (may be negative).

Adequate Financing Rate:

The tax rate formulated by taking the average benefit cost rate plus a solvency amount. The average benefit cost rate is equal to the average of the previous six calendar year ratios of total benefits paid to total taxable wages. The

solvency amount is equal to the difference between the state's current Trust Fund Balance, including outstanding advances as of Jan. 1, and the Trust Fund Balance needed to have an AHCM of 1.0, divided by five, divided by taxable wages. (For states above a 1.5 AHCM a negative solvency amount (subtracted from benefit costs) is included equal to the amount that the trust fund exceeds the trust fund balance needed to have a 1.0 AHCM, divided by 5, divided by taxable wages).

13) The Average Tax Rate Compared to The Adequate Financing Rate:

The percentage difference between the Average Tax Rate on Taxable Wages and the Adequate Financing Rate.

Benefit Charging

14) Benefits Charged to active Taxable Employers:

The portion of total benefits paid that is assigned to individual employer experience rating accounts.

15) Benefits Non-Charged to Employers:

The amount of benefits attributable to taxable employers but not charged to individual employer accounts.

16) Benefits Charged to Inactive Accounts:

Benefits assigned to employers that are no longer active.

17) Total Reimbursable Benefits Paid:

Benefits paid to all claimants from reimbursable employers.

18) Benefits Charged to Employers at the Maximum Tax Rate in Excess of the Contributions from Those Employers:

The amount by which benefit charges exceed projected contributions for employers that are assigned the maximum tax rate in the states tax schedule for the year. This amount is also reported as a percentage of total benefits paid (divided by total benefits).

The Contributions from Maximum rated employers as a Percent of their Charged Benefits:

The amount of contributions from maximum rated employers divided by the total charged benefits from these employers.

Distribution of Wages, Benefits and Contributions, by Effective Tax Rates

19) Proportion of Total Wages by Effective Tax Rate:

Proportion of total wages aggregated within intervals of effective tax rates (total contributions divided by total wages). Also shown are the percent of total wages for employers assigned the minimum tax rate and the percent of total wages for employers assigned the maximum tax rate.

20) Proportion of Employers by Effective Tax Rate:

Proportion of employer accounts aggregated within intervals of effective tax rates (total contributions divided by total wages). Also shown are the percent of total wages for employers assigned the minimum tax rate and the percent of total wages for employers assigned the maximum tax rate.

21) Proportion of Total Benefits Charged to Employer Accounts by Effective Tax Rate:

Proportion of total benefits charged aggregated within intervals of effective tax rates (total contributions divided by total wages). Also shown are the percent of benefits charged to employers assigned the minimum tax rate and the percent of benefits charged to employers assigned the maximum tax rate.

22) Proportion of Estimated Contributions by Effective Tax Rate:

Proportion of total contributions aggregated within intervals of effective tax rates (total contributions divided by total wages). Also shown are the percent of contributions for employers assigned the minimum tax rate and the percent of contributions for employers assigned the maximum tax rate.
